

New UI: How to Create a Compound Prescription

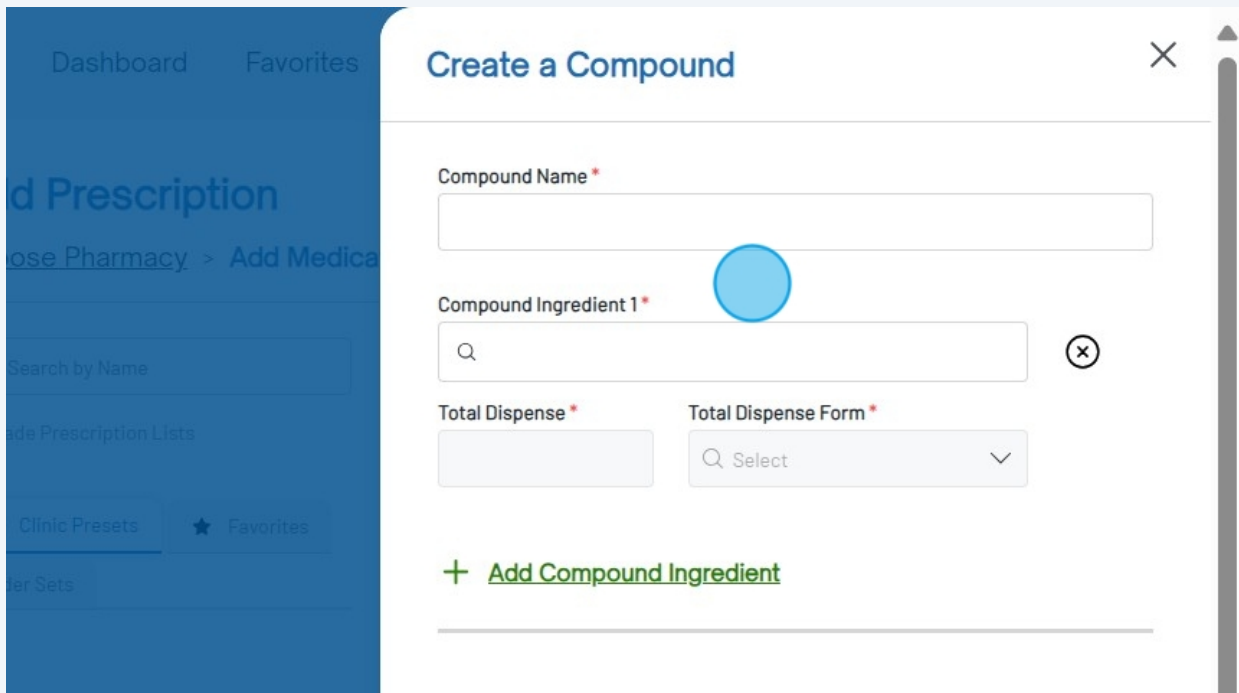

1 To begin, click the **Add a Prescription** button on the patient landing page.

2 Click on the **Create a Compound** text.

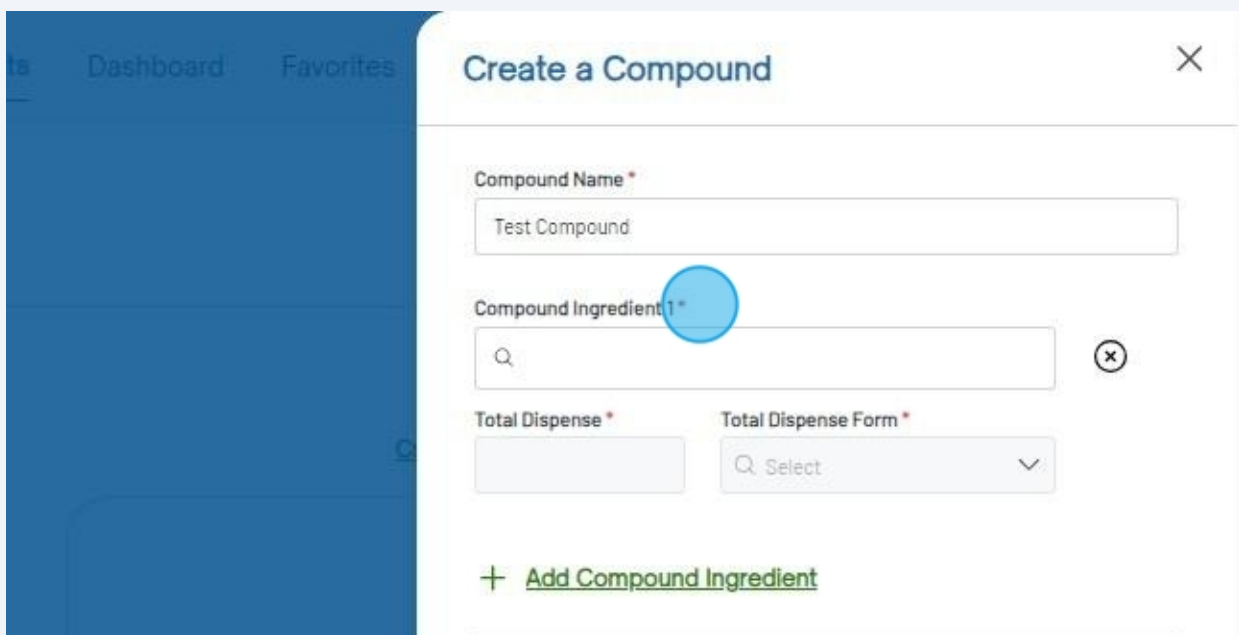

- 3 Fill in the Compound Name field and add your first ingredient.

The screenshot shows a mobile application interface with a blue sidebar on the left containing navigation options like 'Dashboard', 'Favorites', 'd Prescription', 'ose Pharmacy > Add Medica', 'Search by Name', 'ade Prescription Lists', 'Clinic Presets', and 'Favorites'. The main content area is a white modal titled 'Create a Compound' with a close button (X) in the top right. The form contains the following fields: 'Compound Name *' (empty text input), 'Compound Ingredient 1 *' (search input with a magnifying glass icon and a close button), 'Total Dispense *' (empty text input), and 'Total Dispense Form *' (dropdown menu with 'Select' and a downward arrow). A green '+ Add Compound Ingredient' link is at the bottom. A blue circle highlights the 'Compound Name' field.

- 4 Search for the ingredient in the search bar. Select the desired ingredient and strength, then provide the Dispense and Total Dispense Form.

This screenshot shows the same 'Create a Compound' form, but with 'Test Compound' entered in the 'Compound Name *' field. The 'Compound Ingredient 1 *' field is highlighted with a blue circle. The other fields ('Total Dispense *' and 'Total Dispense Form *') remain empty. The '+ Add Compound Ingredient' link is still visible at the bottom.

5

If the desired strength or ingredient is not present in the search results, click on **Add as a Custom Compound**. This will allow you to create a custom ingredient.

Compound Ingredient 2 *

Q Tretinoin

- Tretinoin Powder
(Medication)
- Tretinoin Oral Capsule, 10 MG
10 MG
(Medication)
- Tretinoin External Gel, 0.01 %
0.01 %
(Medication)
- Tretinoin External Gel, 0.025 %

+ Add as a Custom Compound

Search for diagnosis codes by name: max 2 codes per set.

+ Add Second Set of Diagnosis Codes

6

If you chose to create a custom ingredient, you must confirm that the ingredient is **not a controlled substance** before adding it to the compound. Check the box to confirm.

Compound Ingredient 1 *

Q Tretinoin External Gel 0.01 %

Total Dispense * 39

Total Dispense Form * Q Gram

Compound Ingredient 2 *

Q Tretinoin - 20

Total Dispense *

Total Dispense Form * Q Select

This is Not a Controlled Substance *

+ Add Compound Ingredient

7

Once all the ingredients are added, fill in the rest of the prescription information. Required fields are marked with a red asterisk (*).

The screenshot shows a prescription form with the following fields and options:

- No Substitutions Urgent
- Effective Date: 01/02/2025
- Patient Directions * (with a blue circle highlighting the field)
- Total Dispense * (input field)
- Total Dispense Form * (dropdown menu with "Select" option)
- Refills * (input field)
- Day Supply * (input field)
- Dose Calculator (dropdown menu)
- Pharmacy * (input field with "Gateway Pharmacy" and a search icon)
- Pharmacy Notes (dropdown menu with "Select Custom Note" option)

8

Once all the required fields are completed, click the **Create Compound** button.

The screenshot shows the bottom part of the prescription form with the following fields and buttons:

- Refills * (input field with "0")
- Day Supply * (input field with "30")
- Dose Calculator (dropdown menu)
- Pharmacy * (input field with "Gateway Pharmacy" and a search icon)
- Pharmacy Notes (dropdown menu with "Select Custom Note" option)
- Buttons: [Clear](#), (in a rounded rectangle), and (in a green rounded rectangle with a blue circle highlighting it)

9

The compound will appear under the **Items to Prescribe** section for your review.
