

Creating a Favorite From a Prescription

1

When adding a Medication, Supply, or Compound, look for the **Create as Favorite** text when entering the prescription details.

The screenshot shows a portion of a form with a blue sidebar on the left. At the top, there is a text input field with the placeholder text "Select custom name". Below it is a larger text input field with the placeholder text "Enter text for Pharmacy". In the center of the form, there is a green star icon followed by the text "Create as Favorite", which is highlighted with a blue circle. At the bottom of the form, there are three buttons: a "Clear" link, a "CANCEL" button in a rounded rectangle, and a "CREATE MEDICATION" button in a green rounded rectangle.

2

Once clicked, the **New Favorite Name** field will appear. This will be the name your favorite is saved under.

The screenshot shows a single text input field with the label "New Favorite Name" above it. The input field is empty and has a blue circle on its right side. To the right of the input field is a small circular icon containing an 'x'.

3

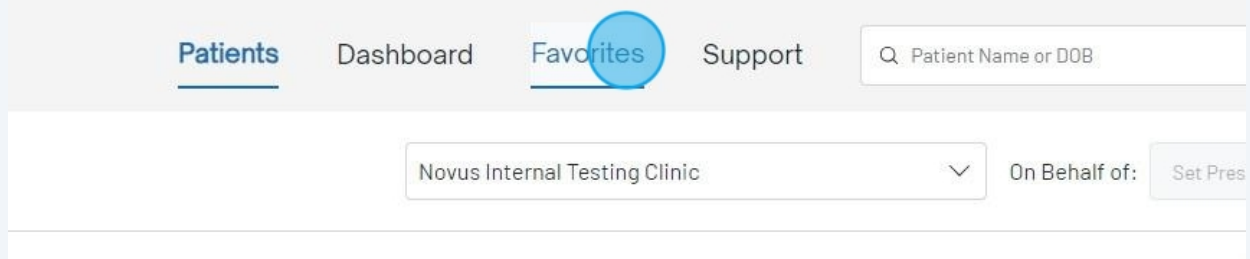

The favorite will become available for immediate use under the **Favorites** section of the prescribing flow.

Edit and Manage All Favorites

4

Click on the **Favorites** section in the top navigation.

5

Manage your favorites by category here. You can edit or remove existing favorites or add new ones by clicking the **Add Item** button.

For a Compound, you will need to add each individual ingredient. Once all the ingredients and required fields are filled, click **Create Compound** to add the favorite.

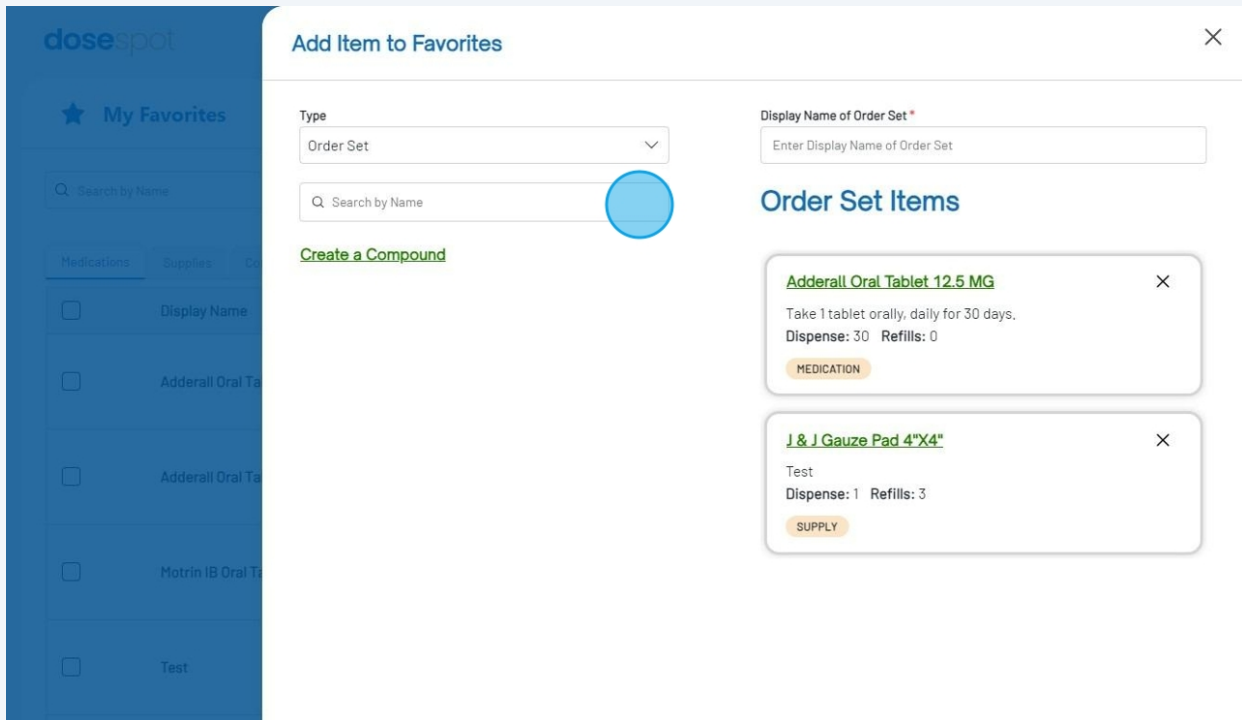

The screenshot shows a web interface for adding a favorite item. On the left is a dark blue sidebar with the text 'My Favorites' and a list of items including 'Adderall Oral Ta', 'Adderall Oral Ta', and 'Motrin IB Oral Ta'. The main content area is titled 'Add Item to Favorites' and contains the following form elements:

- Type:** A dropdown menu with 'Compound' selected. A blue circle highlights the dropdown arrow.
- Display Name of Compound *:** A text input field with the placeholder text 'Enter Display Name of Compound'.
- Compound Name *:** An empty text input field.
- + Add Compound Ingredient:** A green button with a plus sign and the text 'Add Compound Ingredient'.
- Diagnosis Codes (Optional):** A search field with a magnifying glass icon and the placeholder 'Search Item'. Below it is the text 'Search for diagnosis codes by name. Max 2 codes per set.' and a button '+ Add Second Set of Diagnosis Codes'.
- No Substitutions:** A checkbox that is currently unchecked.
- Patient Directions *:** An empty text input field.

10

An Order Set is a new type of favorite that lets you group multiple favorites together to prescribe them all at once. Search for the Medication or Supply in the search bar or click Create a Compound. Items added to the order set will appear under the **Order Set Items** section for your review.

Once created, you will be able to use the Order Set favorite to quickly add bulk items for the patient with a single click.

11

The favorites will become available for immediate use under the **Favorites** and **Order Sets** sections of the prescribing flow.
