

# MBI Lookup Tool

Reduce Denials and Increase Revenue

[Schedule a demo](#)

## Automate coverage identification

Powered by robust APIs, our Lookup Tool accelerates the Medicare Beneficiary Identifier (MBI) search process with greater efficiency, limitless scalability, and success without disruption — preventing claim denials.

## Experience our difference

With pVerify, there's no more expensive credentialing, time-consuming manual entry, or search across multiple portals.

Look up 2,000 patients in one portal and one instance. Get results in under 10 minutes, while giving your staff more time to connect with patients.

## Three ways to access MBI Lookup

Single Patient

Batch Upload

MBI Lookup API

## The Right MBI Solution, Right Now

- ✓ Requires only name and DOB
- ✓ Offers unlimited batch processing and real-time patient lookup
- ✓ Generates results that include Medicare A and B status and dates
- ✓ Lists Medicare Eligibility and Medicare Advantage Payers (Enhanced MBI Lookup)
- ✓ Always-on development support

## About pVerify

DoseSpot delivers best-in-class e-prescribing, insurance verification and revenue cycle management solutions for healthcare providers, improving price transparency and outcomes for patients and reducing clinician and staff burnout. The company's comprehensive solutions strengthen connections among patients, prescribers, payers, pharmacies and health technology vendors – whether it's getting prescriptions into the hands of patients at a price they can afford or providing visibility into a patient's benefit plan. Hundreds of thousands of providers, health plans, pharmacies and health technology partners rely on DoseSpot and its subsidiary pVerify to facilitate hundreds of millions of healthcare transactions each year.
